Non-GAAP Financial Measures & Definitions

This release contains certain financial information that is not presented in conformity with U.S. GAAP. These non-GAAP measures include Adjusted EBITDA, Adjusted EBITDA Margin, Adjusted Earnings Per Share (Adjusted EPS), revenue on a constant currency basis and revenue growth on a constant currency basis.

We believe that these non-GAAP measures provide users of the Company's financial information with additional meaningful information to assist in understanding financial results and assessing the Company's performance from period to period. Management believes these measures are important indicators of operations because they exclude items that may not be indicative of our core operating results and provide a better baseline for analyzing trends in our underlying businesses, and they are consistent with how business performance is planned, reported and assessed internally by management and the board of directors of the Company. Our non-GAAP financial measures should not be considered in isolation, or as substitutes for, financial information prepared in accordance with GAAP. Non-GAAP measures have limitations as they do not reflect all the amounts associated with our results of operations as determined in accordance with GAAP, and should only be used to evaluate our results of operations in conjunction with the corresponding or most directly comparable GAAP measures. We strongly encourage investors and shareholders to review our financial statements and publicly filed reports in their entirety and not to rely on any single financial measure.

A reconciliation is provided at the end of this release for each historical non-GAAP financial measure to the most directly comparable financial measure stated in accordance with U.S. GAAP. We encourage investors and shareholders to review the related U.S. GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable U.S. GAAP financial measures, and not to rely on any single financial measure to evaluate our business. We do not provide a reconciliation of forward-looking non-GAAP financial measures to the most directly comparable U.S. GAAP financial measures on a forward-looking basis because we are unable to predict with reasonable certainty or without unreasonable effort non-recurring items that may arise in the future.

Adjusted EBITDA: We define Adjusted EBITDA as net income (loss), adjusted to remove the impact of interest income, interest expense, income tax expense and depreciation and amortization, with further adjustments to eliminate the effects of loss on equity method investments, effect of applying the valuation method of fair value through profit or loss, impairment of goodwill, non-cash stock-based compensation and certain other non-recurring costs.

Adjusted EBITDA Margin: We define Adjusted EBITDA Margin as Adjusted EBITDA divided by revenue.

Adjusted Earnings Per Share (Adjusted EPS): We define Adjusted Earnings Per Share as Earnings Per Share before interest expense, interest income, income tax expense and depreciation and amortization with further adjustments to eliminate the effects of loss on equity method investments, effect of applying the valuation method of fair value through profit or loss, impairment of goodwill, non-cash stock-based compensation and certain other non-recurring costs. We calculate Adjusted Earnings Per Share by making the adjustments described herein from Net Income (Loss) and dividing by basic and diluted weighted average shares of common stock outstanding, respectively, for the applicable period.

Revenue on a Constant Currency Basis: We define revenue on a constant currency basis as revenue adjusted to remove the impact of foreign currency rate fluctuations and the impact of deconsolidated and transferred operations. We calculate revenue on a constant currency basis in a given period by applying the average currency exchange rates in the comparable period of the prior year to the local currency revenue in the current period. We calculate revenue on a constant currency basis in each of our revenue streams – Paid Content, Advertising and IP Adaptations – using the same method as laid out herein.

Revenue Growth on a Constant Currency Basis: We define revenue growth on a constant currency basis as period-over-period growth rates of revenue, adjusted to remove the impact of foreign currency rate fluctuations and the impact of deconsolidated and transferred operations. We

calculate revenue growth (as a percentage) on a constant currency basis by determining the increase in current period revenue over prior period revenue, where current period foreign currency revenue is translated using prior period average currency exchange rates.

Reconciliation of Non-GAAP Measures

In addition to adjustments for foreign exchange fluctuations, we have also further adjusted revenue to exclude the impacts of deconsolidated and transferred operations to show growth or loss exclusive of these changes ("Revenue on a Constant Currency Basis"). Revenue on a Constant Currency Basis is a Non-GAAP metric that management believes adds value but has its limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP.

The following table presents a reconciliation of revenue to revenue on a constant currency basis, and ARPPU to ARPPU on a constant currency basis, respectively, for each of the periods presented.

¹ ARPPU is calculated by taking Paid Content revenue and dividing it by the number of monthly paid users ("MPU") for such month, averaged over each month in the given period. ARPPU on a constant currency basis is calculated by dividing Paid Content revenue on a constant currency basis by the number of MPU for such month, averaged over each month in the given period. Where each metric is country specific, the numerator is Paid Content revenue on a constant currency basis by country and the denominator is users by country.
